Holden Jolley

AZURE SOLUTIONS ARCHITECT | CLOUD INFRASTRUCTURE & SECURITY

Hickory, NC · 828-449-7496 · Jolleyholden@gmail.com · LinkedIn · GitHub · Portfolio

SUMMARY

Cloud & security professional with 5+ years across Azure, Entra ID, Intune, endpoint security, hybrid infrastructure, and automation. Led enterprise modernization supporting ~16,000 users, 3,000 endpoints, and ~100 Azure VMs.

CERTIFICATIONS

- Microsoft Certified: Azure Administrator Associate — AZ-104 — Work In Progress
- Microsoft Certified: Azure Solutions Architect Expert — AZ-305 — Work In Progress

TECHNOLOGIES

Azure & Cloud: Azure VMs · VNets · NSGs · VPN · Azure Monitor · Hybrid Cloud · Bicep · Cost Optimization

Identity & Security: Microsoft Entra ID · Conditional Access · MFA · EPM · JIT · LAPS · BitLocker · Windows Hello · Passkeys

Endpoint: Intune · Autopilot · MDT · Jamf

Automation & ITSM: PowerShell · Freshservice · UiPath

EXPERIENCE

Alex Lee — IT Security Analyst / Cloud Infrastructure & Security Lead ***2022–Present***

Azure Cloud Infrastructure, Identity & Security

- Led migration of a ~100-VM RDS environment to Azure, architecting infrastructure, networking, NSGs, VPN connectivity, monitoring, remediation, and cost strategy across four teams; selected site-to-site VPN over ExpressRoute based on workload requirements, resiliency needs, and total cost, and implemented reserved/pre-purchased compute capacity to reduce ongoing infrastructure costs.
- Automated VM health monitoring, reboot remediation, and failure escalation to improve operational resilience and reduce manual intervention.
- Led 1,500+ device migration to Entra ID, Intune & Autopilot from MDT/on-prem AD.
- Designed Autopilot profiles, naming standards, Conditional Access, certificate authentication, and application deployment.
- Implemented MFA, BitLocker, LAPS, Windows Hello, passkeys, EPM, JIT, and multi-admin approval.

Alex Lee — IT Security Analyst / Cloud Infrastructure & Security Lead ***2022–Present***

Azure Cloud Infrastructure, Identity & Security

• Built Freshservice → Entra → Intune provisioning automation, reducing deployment from 2.5–3 hours to 15–20 minutes.

• Implemented Microsoft Global Secure Access to modernize cloud-based network connectivity and provide secure access to enterprise resources without relying solely on traditional network infrastructure.

• Administer Freshservice and Jamf across ~50 Macs and 300 iPads.

• Lead cross-functional cloud, security, identity, endpoint, and automation projects.

Alex Lee — IT Service Desk Agent ***2021–2022***

• Led UiPath automation and onboarding/offboarding process redesign.

• Administered Freshservice workflows, automations, service requests, and integrations.

• Built MDT → Password Manager Pro automation for unique device administrator credentials.

• Transitioned credential management to Intune during the Autopilot modernization.

EDUCATION

University of North Carolina at Pembroke Bachelor of Science in Computer Science · 2016–2020
